

PRODUCT OVERVIEW

Home and Commerical building control & automation

Reliable

Affordable

Easy

VMBEL1-B-20

Edge-lit control module featuring a single touch button, black.

- 1 button control panel featuring RGBW mood and feedback illumination
- Integrated temperature sensor.
- Three options per push button: short and long press duration, along with multi-button functionality.
- Integrated astronomical clock featuring sunrise and sunset indicators.
- Installation using the provided holder with screw attachment.

£110.00

VMBEL2-B-20

Edge-lit control module featuring two touch buttons, black.

- Two-button control panel featuring RGBW mood and feedback lighting.
- Integrated temperature sensor.
- Three options per push button: short and long press duration, along with multi-button functionality.
- Integrated astronomical clock featuring sunrise and sunset indicators.
- Installation using the provided holder with screw attachment.

£135.86

VMBEL4-B-20

Edge-lit control module featuring four touch keys, black.

- Four-button control panel featuring RGBW mood and feedback lighting.
- Integrated temperature sensor.
- Three options per push button: short and long press duration, along with multi-button functionality.
- Integrated astronomical clock featuring sunrise and sunset indicators.
- Installation using the provided holder with screw attachment.

£155.30

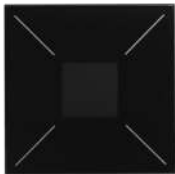

VMBEL1PIR-B-20

Edge-lit glass control module featuring motion and twilight sensors, black.

- 1 button control panel featuring RGBW mood and feedback illumination
- Integrated motion and light sensor
- Integrated temperature sensor.
- Three options per push button: short and long press duration, along with multi-button functionality.
- Integrated astronomical clock featuring sunrise and sunset indicators.
- Installation using the provided holder with screw attachment.

£212.52

VMBELO-B-20

Edge-lit control module featuring an OLED display and temperature controller, black.

- Four-button control panel featuring RGBW mood and feedback lighting, along with an OLED display.
- Eight pages featuring a total of thirty-two buttons, in addition to a clock page, sensor page, and energy consumption page.
- Never again search for the function of a button through text, personal icons, or custom bitmaps.
- Control the built-in thermostat and that of other panels.
- Three options per push button: short and long press duration, along with multi-button functionality.
- Integrated astronomical clock featuring sunrise and sunset indicators.
- Installation using the provided holder with screw attachment.

£257.47

VMBEL1-W-20

Edge-lit control module featuring a single touch button, white.

- 1 button control panel featuring RGBW mood and feedback illumination
- Integrated temperature sensor.
- Three options per push button: short and long press duration, along with multi-button functionality.
- Integrated astronomical clock featuring sunrise and sunset indicators.
- Installation using the provided holder with screw attachment.

£110.00

VMBEL2-W-20

Edge-lit control module featuring two touch buttons, white.

- Two-button control panel featuring RGBW mood and feedback lighting.
- Integrated temperature sensor.
- Three options per push button: short and long press duration, along with multi-button functionality.
- Integrated astronomical clock featuring sunrise and sunset indicators.
- Installation using the provided holder with screw attachment.

£135.86

VMBEL4-W-20

Edge-lit control module featuring four touch buttons, white.

- Four-button control panel featuring RGBW mood and feedback lighting.
- Integrated temperature sensor.
- Three options per push button: short and long press duration, along with multi-button functionality.
- Integrated astronomical clock featuring sunrise and sunset indicators.
- Installation using the provided holder with screw attachment.

£155.30

VMBEL1PIR-W-20

Edge-lit glass control module featuring motion and twilight sensors, white.

- 1 button control panel featuring RGBW mood and feedback illumination
- Integrated motion and light sensor
- Integrated temperature sensor.
- Three options per push button: short and long press duration, along with multi-button functionality.
- Integrated astronomical clock featuring sunrise and sunset indicators.
- Installation using the provided holder with screw attachment.

£212.54

VMBELO-W-20

Edge-lit control module featuring an OLED display and temperature controller, white.

- Four-button control panel featuring RGBW mood and feedback lighting, along with an OLED display.
- Eight pages featuring a total of thirty-two buttons, in addition to a clock page, sensor page, and energy consumption page.
- Never again search for the function of a button through text, personal icons, or custom bitmaps.
- Control the built-in thermostat and that of other panels.
- Three options per push button: short and long press durations, along with multi-button functionality.
- Integrated astronomical clock featuring sunrise and sunset indicators.
- Installation using the provided holder with screw attachment.

£257.47

GP Series

VMBGP1-B-20

Black glass control module featuring a single touch button.

- 1 button control panel featuring a status LED on the front.
- Integrated temperature sensor.
- Three options per push button: short and long press durations, along with multi-button functionality.
- Integrated astronomical clock featuring sunrise and sunset indicators.
- Installation using the provided holder with screw attachment.

£81.73

VMBGP2-B-20

Black glass control module featuring two touch buttons.

- Two-button control panel featuring a white status LED on the front for each button.
- Integrated temperature sensor.
- Three options per push button: short and long press durations, along with multi-button functionality.
- Integrated astronomical clock featuring sunrise and sunset indicators.
- Installation using the provided holder with screw attachment.

£98.08

VMBGP4-B-20

Black glass control panel featuring four touch keys

- Four-button control panel featuring a white status LED for each button.
- Integrated temperature sensor.
- Three functions per push button: short and long press duration, plus multi-button capability.
- Integrated astronomical clock featuring sunrise and sunset indicators.
- Installation using the provided holder with screw attachment.

£122.60

VMBGP4PIR-B-20

Black glass control module featuring four touch buttons and an integrated motion and twilight sensor.

- Four-button control panel featuring a white status LED for each button on the front.
- Integrated motion and twilight sensor
- Integrated temperature sensor.
- Three options per push button: short and long press durations, along with multi-button functionality.
- Integrated astronomical clock featuring sunrise and sunset indicators.
- Installation using the provided holder with screw attachment.

£179.83

VMBGPO-B-20

Black glass control module featuring an OLED display and temperature regulation system.

- Four-button control panel featuring a white status LED on the front for each button.
- OLED display, eight pages with four buttons, clock, sensor, and energy consumption pages
- Never again search for the function of a button through text, personal icons, or custom bitmaps.
- Control the built-in thermostat and that of other panels.
- Three options per push button: short and long press durations, along with multi-button functionality.
- Integrated astronomical clock featuring sunrise and sunset indicators.
- Installation using the provided holder with screw attachment.

£208.43

VMBGP1-W-20

White glass control module featuring a single touch button.

- 1 button control panel featuring a status LED on the front.
- Integrated temperature sensor.
- Three options per push button: short and long press durations, along with multi-button functionality.
- Integrated astronomical clock featuring sunrise and sunset indicators.
- Installation using the provided holder with screw attachment.

£81.73

VMBGP2-W-20

White glass control panel featuring two touch buttons.

- Two-button control panel featuring a white status LED on the front for each button.
- Integrated temperature sensor.
- Three options per push button: short and long press durations, along with multi-button functionality.
- Integrated astronomical clock featuring sunrise and sunset indicators.
- Installation using the provided holder with screw attachment.

£98.08

VMBGP4-W-20

White glass control panel featuring four touch keys.

- Four-button control panel featuring a white status LED for each button.
- Integrated temperature sensor.
- Three functions per push button: short and long press duration, plus multi-button capability.
- Integrated astronomical clock featuring sunrise and sunset indicators.
- Installation using the provided holder with screw attachment.

£122.60

VMBGP4PIR-W-20

White glass control module featuring four touch keys and an integrated motion and twilight sensor.

- Four-button control panel featuring a white status LED on the front for each button.
- Integrated motion and twilight sensor
- Integrated temperature sensor.
- Three options per push button: short and long press duration, plus multi-button functionality.
- Integrated astronomical clock featuring sunrise and sunset indicators.
- Installation using the provided holder with screw attachment.

£179.83

VMBGPO-W-20

White glass control module featuring an OLED display and temperature regulation system.

- Four-button control panel featuring a white status LED for each button on the front.
- OLED display, eight pages with four buttons, clock, sensor, and energy consumption pages
- Never again search for the function of a button through text, personal icons, or custom bitmaps.
- Control the built-in thermostat and that of other panels.
- Three options per push button: short and long press duration, plus multi-button functionality.
- Integrated astronomical clock featuring sunrise and sunset indicators.
- Installation using the provided holder with screw attachment.

£208.43

Push-button interfaces

VMB6PB-20

6-channel push-button interface for universal installation

- Compatible with push buttons from various brands, with or without feedback LEDs (12V or 24V).
- Installation in a flush-mounting box behind the push button
- Six input channels and six LED output channels (6 x 10mA @ 15V)
- Three options per push button: short and long press duration, plus multi-button functionality.
- Integrated astronomical clock featuring sunrise and sunset indicators.

£61.30

VMBIN

Universal single-channel input module

- 1 channel (potential free contact), to be utilized in conjunction with a push button or digital contact.
- Three functions: short and long press duration, along with multi-button capability.
- Integrated astronomical clock featuring sunrise and sunset indicators.

£39.65

Energy management kWh meters

VMBKWH18

1-phase kWh meter 5(80) A for DIN rail

- Single-phase kWh meter, 1000 pulses/kWh SO output (compatible with VMB8IN-20)
- Ideal for overseeing the consumption of sub-circuits within the 2DIN installation.

£62.94

FIN7M.24.8.230.0110

MID-certified single-phase bidirectional energy meter 5(40) A featuring SO pulse output

- Single-phase kWh meter, 1000 pulses/kWh SO output (compatible with VMB8IN-20)
- Optimal for overseeing solar panel output or sub-circuit usage.
- MID certified and suitable for billing purposes.
- 1DIN

£117.69

FIN7M.38.8.400.0112

MID-certified single or three-phase bidirectional energy meter 5(80) A featuring two SO pulse outputs.

- Single or three-phase kWh meter, bidirectional, 500 pulses/kWh SO1 and SO2 output (compatible with VMB8IN-20)
- Best used to monitor electrical energy flow, to and from the national grid.
- MID certified and suitable for billing purposes.
- 3DIN

£246.26

Input module

VMB8IN-20

8-channel digital input module for DIN rail

- Input module for switching contacts, pulses (kWh meters), or any type of dry contact.
- Eight input channels with a total of sixty-four alarm channels, which can be freely allocated across each channel.
- Digitise simple button events, for use across the Velbus system. IE classic volt free buttons like door bell press buttons or any momentary switch.

£130.78

Access control and alarm

Keypad

VMBKP

RFID-enabled code keypad for Velbus

- Vandal-resistant IP65 keypad directly connected to Velbus.
- Ideal for access control and the operation of garage gates at vacation residences.
- 2 access groups for private and visitors
- Includes 2 RFID proximity cards.

Not available in UK

VMBID1

Set of RFID proximity cards (3) for VMBKP

- RFID user cards / badges for use with VMBKP

Not available in UK

VMBID2

Set of three RFID proximity key fobs for VMBKP

- RFID user cards / badges for use with VMBKP

Not available in UK

Door contact

VMBCS01

Magnetic gate contact

- Magnetic contact designed for installation on access gates and doors.
- Designed for use with an input module to verify gate & door state (fully closed vs NOT fully closed).

£29.35

Motion detector

VMBPIR-20

Mini PIR motion and twilight sensor for flush or surface mounting.

- Indoor motion and dusk sensor
- Ideal for application in stairwells, storage areas, and (guest) restrooms.
- 26mm drill hole for recessed installation (40mm deep)
- Detection angle: 94° (horizontal) and 82° (vertical); range: 5 meters.

£110.35

Wireless technologies

VMBRF8S

8-channel radio frequency receiver

- Wireless encrypted receiver for Velbus
- Functions in conjunction with a 2-button or 4-button remote control.
- The receiver emulates eight push-button channels within the Velbus system.

£179.82

VMBRFT2H

2-button RF remote controller

- 2-Button Remote Control for Pairing with VMBRF8S
- 868 MHz frequency range
- Extended battery longevity

No longer stocked

VMBRFT4H

4-button RF remote controller

- 4-Button Remote Control for Pairing with VMBRF8S
- 868 MHz frequency range
- Extended battery longevity

£68.38

Smoke sensor sets

VMBSMK230

Velbus Connected Smoke Triple 230V Pack

- 3x GIRA Smoke Detector Dual Q, including base 230V sensors and VMB1RYS module for relay output and input contact.
- Connect smoke detectors to one another using Alarm Cable 2x0.75 +4x0.22.
- Power supply through 230V AC
- Reporting of alarm or cable break for the group through Velbus, along with siren activation via Velbus.

£179.83

Additional heads
£89.01

VMBSMK3

Velbus Connected Smoke Triple Battery Pack

- 3x GIRA Smoke Detector with Dual Q Sensors and VMB1RYS Module for Relay Output and Input Contact
- Connect smoke detectors to one another using Alarm Cable 2x0.75 +4x0.22.
- Battery-operated (10-year lifespan)
- Reporting of alarm or cable break for the group through Velbus, along with siren activation via Velbus.

Not available
in UK

VMBSMK1

Velbus-connected smoke battery pack

- GIRA Smoke Detector Dual Q Sensor and VMB1RYS Module for Relay Output and Input Contact
- Battery-operated (10-year lifespan)
- Reporting of alarm or cable break through Velbus, along with siren activation via Velbus.

Not available
in UK

Roller shutter operation

VMB2BLE-10

2-channel roller shutter module featuring a wide range of options for DIN rail installation.

- Roller shutter module for dual motor controls: 2x (up/down) channels
- Specifically engineered to render simultaneous up/down steering unfeasible.
- Maximum 16A per module at 230V (4A inductive), 24V DC control through supplementary contactors.
- Applications such as solar shades, window coverings, roller shutters, screens, and similar products.
- TIP: Incorporate a wind sensor in your installation to prevent operation during high wind speeds.

£155.30

sensors

Motion detectors

VMBPIR-20

Mini PIR motion and twilight sensor for flush or surface mounting

- Indoor motion and dusk sensor
- Ideal for application in stairwells, storage areas, and (guest) restrooms.
- 26mm drill hole for recessed installation (40mm deep)
- Detection angle: 94° (horizontal) and 82° (vertical); range: 5 meters.

£110.35

VMBPIRO-B-20

Black PIR outdoor motion sensor with twilight and temperature detection.

- Outdoor motion and light sensor (IP55) connected directly to the Velbus bus.
- Ideal for managing illumination in driveways, gardens, facades, parking lots, and similar areas.
- Integrated temperature measurement
- Detection angle: 150°, range: 12 m, installation height: 2 to 4 m
- Integrated astronomical clock for time-sensitive operations

£162.68

VMBPIRO-W-20

White passive infrared motion, twilight, and temperature sensor designed for outdoor applications.

- Outdoor motion and light sensor (IP55) connected directly to the Velbus bus.
- Ideal for managing illumination in driveways, gardens, facades, parking lots, and similar areas.
- Integrated temperature measurement
- Detection angle: 150°, range: 12 m, installation height: 2 to 4 m
- Integrated astronomical clock for time-sensitive operations

£162.68

Meteorological sensor

WEATHER-2

Professional weather station featuring a thermometer, anemometer, rain sensor, and light sensor - Modbus RTU

- Advanced METEO module for building management featuring no moving parts
- Refrain from utilizing screens during strong wind gusts and/or heavy rainfall.
- Enables VMBSIG-21 with Modbus RTU (required) to create automations, based on the intensity of rain, light levels, twilight conditions, etc.
- Direct connection required (e.g., alarm cable 2x0.75+4x0.22)

£980.01

Anemometer

WINDSENSE

Wind sensor featuring a 0-10V output.

- 0-10V signal for connection to VMB4AN module
- Refrain from operating screens during high wind gusts.
- Inclusion of mounting bracket
- A direct connection is required between VMB4AN and the sensor (e.g., alarm cable 2x0.75+2x0.22).

in production

Air quality sensor kit

VMBAIRQ

Air quality configured with Theben AMUN 716 & VMB4AN

- Air quality is monitored using the Theben AMUN 716 sensor, which measures temperature (5-40°C), humidity (30-80%), and CO² levels (0 - 5000 ppm) through three analogue signals to the VMB4AN (included).
- Optimal for regulating your air ventilation system in accordance with the air quality of your living environments.
- A direct connection is required between VMB4AN and the sensor (e.g., alarm cable 2x0.75+4x0.22).

**MRRP Excl VAT
From 1st Oct 25**

£155.30

Analog input module for sensors.

VMB4AN

4-channel analog input module

- Analog four-channel input module for PT100/PT1000 temperature sensors, 0-10V, 0-2 kOhm, 5-500 Hz, 0-20mA, or 4-20mA signals.
- Integrated 24V power supply (150 mA) for direct sensor power.
- Perfect for integrating air quality, wind, rain, and level measurements into your smart home.

£318.77

Digital input module for sensors.

VMB8IN-20

8-channel digital input module for DIN rail

- Input module for switching contacts, pulses (kWh meters), or any type of dry contact.
- Eight input channels with a total of sixty-four alarm channels, which can be freely allocated across each channel.
- Digitise simple button events, for use across the Velbus system. IE classic volt free buttons like door bell press buttons or any momentary switch.

£130.78

Lighting management systems

Dimmer controller

VMB8DC-20

8-Channel 0/1-10V Universal Dimmer Controller

- Dimmer controller featuring 8x 0-10V outputs for third party 0-10V dimmers.
- Ideally paired with Fin15.11.8.230.400 slave dimmer.
- Included in 10 year warranty, when installed precisely to manufacturers specifications

£204.33

VMB2DC-20

2-Channel 0/1-10V Universal Dimmer Controller

- Dimmer controller featuring 2x 0-10V outputs for third party 0-10V dimmers.
- Ideally paired with Fin15.11.8.230.400 slave dimmer.
- Included in 10 year warranty, when installed precisely to manufacturers specifications

£87.30

LED Dimming Device

VMB4LEDPWM-20

4-channel LED dimming module

- LED dimmer featuring 4x LED PWM outputs (12-24V), with a maximum of 5A per channel.
- Control LED strips directly via Velbus, eliminating the need for an additional controller.
- For the management of individual LED strips or RGB(W) strips.

£214.96

Halogen / Mains replacement LED / dimmable Compact FLuorescent

FIN15.11.8.230.0400

Slave dimmer - 0-10 V Input 230 VAC - 400 W

- To be utilized in conjunction with the VMB8DC-20 dimmer controller.
- Dimming of dimmable LEDs, energy-efficient lamps, and halogen lamps.
- The module has a width of 1DIN; always allocate 2DIN during installation (1DIN for cooling purposes).
- Dimming techniques: phase control or phase cut-off combined with transformer functionality

£98.90

FIN015.0.230

Dimming compensator

- To be utilized in conjunction with FIN15.11.8.230.0400 slave dimmer.
- Absorbs the leakage current from LED lamps when the lamps are maintained at a minimum illumination.

£5.68

DALI

VMBDALI-20

Velbus-DALI Interface

- Interface for lamp control through Velbus DALI.
- Integrated DALI power supply (disabled by default)
- Connect as many as 64 DALI devices across 16 groups and scenes using this gateway.
- No supplementary software necessary.

£490.42

Control modules
Relay modules

MRRP Excl VAT
From 1st Oct 25

VMB1RYS
Mini 1-channel changeover relay module (suitable for standalone and Velbus operation)

- Mini relay featuring NO, NC, and COM contacts, along with an input contact.
- Application for local control of socket or light points, as well as the operation of gates and doors.
- Maximum 10A for resistive current or 6A for capacitive current at 230V AC.

£69.48

VMB4RYLD-10
4-channel relay module featuring voltage outputs for DIN rail installation.

- Four relay channels featuring a 230V AC input (4x 230V AC output) and local control.
- Ideal for managing lighting circuits (maximum 16A @ 230V per module).
- 40 distinct functions: momentary control, on/off, delayed activation, delayed deactivation, timer, ...

£179.83

VMB4RYNO-10
4-channel relay module featuring floating contacts for DIN rail installation.

- 4 relay channels with floating contacts (normally open) and local control
- Versatile isolated connections (maximum 16A @ 230Vac per channel).
- Use SG-ready signal to control alarm and HVAC systems through dry contacts.
- 40 distinct functions: momentary control, on/off, delayed activation, delayed deactivation, timer, ...

£179.83

Auxiliary contactors

FIN22.32.0.230.4340
DIN rail switch, 2 x Normally Open, 230 VAC, 25 A

- DIN rail contactor for switching a double pole 25A in conjunction with a relay module.
- Applications: illumination systems, engines, outlets
- 1DIN

£39.60

FIN22.44.0.230.4310
DIN rail switch, 4 x NO, 230 VAC, 40 A

- DIN rail contactor for switching 4-pole 40A in conjunction with relay module
- Applications: charging stations, heat pumps, safety circuits
- 3DIN

£77.60

FIN40.52.9.012.0000
General-purpose DPDT relay, 8A, 12V

- Miniature power relay, double pole, 12V, 8A
- To be utilized with foot FIN95.05SPA.

£6.13

FIN95.05SPA
Socket for Series 40/44 W/O95.01

- Din rail mounting base for mini power relay FIN40.52.9.012.0000

£6.50

IoT and Networking

VMBSIG-20
Signum IoT Gateway

- Internet of Things (IoT) gateway for seamless remote operation of your Velbus installation through your smartphone.
- Comprehensive logging of activities within your installation
- Integration with a range of other online services through Home Assistant

£510.86

VMBSIG-21
Signum IoT Gateway featuring P1
and Modbus RTU ports

- Internet of Things (IoT) gateway for seamless remote operation of your Velbus installation through your smartphone.
- Integration with a range of other online services through Home Assistant
- Double RJ12 P1 port for reading digital meter data (energy management) - RJ12 cable required (not included).
- Dual Modbus RTU (RS485) interface for connecting to external devices.

£613.00

RUT200SET
Teltonika RUT200 Industrial LTE
Wi-Fi Router Set

- For installations in remote areas where reliable internet access cannot be assured.
- Connects to the internet using a 4G SIM card (not included) and offers WiFi and LAN connectivity.
- Incorporating external antennas and accessories to activate the Velbus bus voltage.
- The existing internet connection can serve as the primary connection or as a backup through the WAN port.

£179.83

Modules kit

VMBSTART-B-10
Velbus introductory package
including a black glass control
module featuring an OLED screen.

- Ideal starter kit for initiating your journey with Velbus!
- Includes a four-button control panel with OLED display, a four-channel relay module, a power supply, a USB programming module, and the requisite cables.
- Begin your journey to explore the fundamentals of Velbus, enabling you to incorporate this hardware into your project.
- Download the complimentary software package Velbuslink at velbus.eu.

VMBDIMSET4
Velbus 4-channel dimmer set

- Dimming configuration utilizing an 8-channel dimmer controller alongside 4 Finder slave dimmers.
- Perfect for compact residences
- To be expanded increasingly.

£542.96

VMBDIMSET8
Velbus 8-channel dimmer set

- Dimming configuration utilizing an 8-channel dimmer controller alongside 8 Finder slave dimmers.
- Perfect for medium-sized residences.

£889.11

VMB2PSET4
4-channel relay assembly for
double-pole switching

- Double-pole switch assembly
- Switch 4 channels double pole rated at 25A per channel @ 230V AC
- Ideal for substantial consumers, heating devices, outlets.

£394.61

Configuration modules

MRRP Excl VAT
From 1st Oct 25

VMBUSB-20
USB configuration module for DIN rail

- Programming module for Velbus via USB connection
- 1DIN: simple to install and uninstall from the setup
- This module is not required to remain in the installation.

£93.99

Power Sources

VMBPSU-2
Velbus DIN Rail Power Supply - 15 VDC - 4 A

- Power supply 15V 4A 60W specifically engineered for Velbus installations.
- Determine the number of power supplies required through velbus.eu.

£93.98

VMBSUMNGR-20
Velbus Power Supply Controller

- This module consistently monitors the status of two power supplies (Excl.), guaranteeing a dependable and uninterrupted power supply to your installation.
- Boost mode with the combined capacity of two power supplies.
- Designed for use with lead-acid batteries as a backup power source.

£168.13

Accessories and Miscellaneous parts

Connectors and cables

1187192
Bus cable splitter connector

- DIN rail connection terminal for Velbus installations
- Up to six connections per block
- Rood (+): Operating at 15V (± 3V)
- Black (-): Voltage Ground
- Yellow (H): CANbus High
- White (L): CANbus Low

Pack of 10
£122.64

VMBNCNT
Velbus connector reserve set (10x)

- Spare set of ten bus connectors for Velbus control panels and VMB6PB-20 modules.

£14.72

VMBCABLE20SET
Velbus connection cable set, 20 cm (25 pieces)

- Connection cable for DIN modules - 20 cm in length
- Optimal for module-to-module connections

£69.43

VMBCABLE40SET
Velbus connection cable set, 40 cm (10 pieces)

- Connection cable for DIN modules - 40 cm in length
- Optimal for rail-to-rail connections

£49.45

VMBCABLE150SET
Velbus connection cable set, 1.5 meters (5 pieces)

- Connection cable for DIN modules - 150 cm in length
- Optimal for cabinet-to-cabinet connections

£49.05

VMBRAIL-R
Connecting rail for DIN rail modules (18M)

- Connecting rail for white Velbus DIN modules.
- Nine connections for Velbus modules, four connections for bus cable (power and data).

£19.50

RJ12CABLE5
5-meter RJ12 cable

- Cable connecting the VMBSIG-21 to the P1 port of your digital meter
- High-quality signal transmission

£15.86

Mounting hardware for control panels

VMBGPFS
Set of 5 LN4702 Screw Mount
Holders for the VMBEL and VMBGP
Series

- Control panel installation using a screw mounting bracket.

£16.41

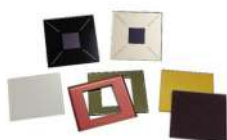

VMBELGPMOUNT
Set of 5 LN4702BG Clamp Mount
Holders for the VMBEL and VMBGP
Series

- Control panel installation using a clamp mounting bracket

Not suitable
for UK boxes

Personalization

VMBRAL
Custom RAL color for your Velbus
glass panels

- Customize your Velbus installation with bespoke control panels available in any RAL color.
- One-time fee per color/installation; please reach out to us at www.velbus.eu/ral.
